Experience the Benefits of On-Site Hemodialysis

Our program is provided through a partnership with Dialyze Direct and includes a 5-day per week model. The collaborative initiative supports patients living with end stage renal disease while concurrently receiving rehabilitation and/or skilled nursing services. The treatment offers the latest in medical technology in a comfortable environment, managed by board-certified nephrologists. The on-site NxStage hemodialysis technology uses a shorter dialyzing time to promote an enhanced patient experience and aims to transform the traditional hemodialysis model into a social and person-centered care.

**A collaborative
partnership:**

Program Highlights:

- Individual treatment planning by our Interdisciplinary Team
- Clinical supervision by Board Certified Nephrologists
- Specially designed dialysis treatment room
- Specialized diets formulated by a registered dietician
- Individual dialysis machines
- Television monitors available during treatment
- Advanced next stage model offers shorter and more frequent sessions which has the potential to improve desired clinical outcomes
- Reduced recovery time after each treatment
- No waiting for transportation
- Recover in the privacy of your own room after treatment
- More time to enjoy activities, therapy, rest & relaxation

Dialyze Direct is the nation's largest provider of staff-assisted home dialysis in skilled nursing facilities.
