Nephrology Hypertension Associates of CNY

Experience the Benefits of the CareFlow Program

St. Camillus's **CareFlow Program** is provided through a partnership with Dialyze Direct, Nephrology Hypertension Associates of CNY, and Nephrology Associates of Syracuse, PC.

The 5-day per week model combines modern technology, in a comfortable environment, surrounded by a caring team of professionals.

The on-site NxStage hemodialysis equipment uses a shorter dialyzing time to promote an enhanced patient experience and aims to transform the traditional hemodialysis model into a more convenient, person-centered care treatment.

- The program supports patients with end-stage renal disease and acute kidney injury
- The collaborative partnership provides the opportunity to enhance access, support continuity of care, reduce re-hospitalizations and improve clinical outcomes
- CareFlow provides the dialysis support while the patient is participating in the facility's short-term rehabilitation program
- Individual treatment planning by the Interdisciplinary Team
- Specialized diets formulated by a registered dietitian
- Keep daily routines in balance with more time for activities, therapy & relaxation
- Individual television monitors
- Reduced recovery time after each treatment
- No waiting for transportation
- Comprehensive discharge planning to support the transition back home
